

GM Allied Health Professional Social Care workforce scoping project

Shining a light on AHPs working across social care

From April to July 2024, I am leading a project to gain insights into the Allied Health Professional social care workforce across Greater Manchester. I will discover the workforce needs, risks and gaps, and make recommendations for an AHP workforce improvement plan for GM.

I am keen to connect with you if you are an AHP working for a local authority or for the private or voluntary sector in a social care role. You might be a registered AHP or an unregistered support worker carrying out delegated AHP tasks or you might employ or contract AHPs in your service or organisation. Please complete the form on the link or QR code and I will be in touch.
